2.2 Release 2.0.....	5

1. Overview

This application is a classic UNO game with single player viability, intended for introverted players who struggle to find peers and suitable locations to play the game. As of now, this application has already launched 2 updates, implementing core game functions and feature improvements.

2. Progress

2.1 Release 1.0

The prototype version of our UNO application, This version implements the core game logic as well as a plain UI. The main focus of this version is to ensure the basic game logic is sound therefore we can add new implementations in the future without concerns.

Implementation Details:

UNO Game Logic: All player actions in a typical UNO game such as drawing and playing cards. The fundamental game operation of performing player action -> passing turn to the next player.

UI Interface: A plain coloured table, a deck button on the top left for drawing cards, and a UNO button for calling UNO.

Patch Fixes:

1.1: Bug fix on Draw 4 challenging logic, Drawing cards outside of player's turn.

1.2: Code refactoring for card creation component.

1.3: Bug fix on edge cases (e.g when deck is empty, etc.)

2.2 Release 2.0

The second version of our UNO application. For this update, we focused on adding new functions and feature improvements, as well as more code refactoring to make future extensions easier.

Implementation Details:

Result Screen: After each game, a result screen will show how many points each player got reflected from the cards they have in their hand. The points calculation is based on the number of cards left in hand when the game ends.

Hand Sorting: To improve gameplay experience, we implemented hand sorting based on colour and value so players can have an easier time locating the exact card they want to play.

Patch Fixes:

2.1: Code refactoring for the “call UNO” components.

2.2: Code refactoring to change the data structure of the deck from ArrayList to HashMap.

2.3: Minor bug fixes.

3. Release Date:

Version	Release Date
1.0	09/10/2025
2.0	09/11/2025
